

Congratulations Solomon Lutheran School On Your New Gymnasium Roof!

It is with great pleasure as the owner of Residential Renovations to be the first to congratulate the members, students, and parents, alike, on the new Atlas StormMaster® Shake Roof Featuring Scotchgard™ Algae Resistant Shingle Protector Roof Shingles for the gymnasium! The color 'Dessert Shake' truly compliments the brick work beautifully! Nice choice!

Bob Schroeder, of the Finance Committee explained, "Earlier in the spring we had noticed the roof was missing a great number of shingles from the gymnasium's roof and shortly thereafter discovered it was due to the high wind storms we had endured. The original building was built in 1976, however even after a great deal of research we could not find any concrete documentation of who had put the current roof on, or when it was completed so we began to look for a roofer."

Then in mid August, during the Pemberville Free Fair a few Solomon Lutheran members had the opportunity to meet members of the Residential Renovations team who were displaying metal roofing solutions at the time. Almost instantly a connection was made among them. After the fair, Scott Pratt, Owner of Residential Renovations met with Bob Schroeder and Tom Miller to investigate the roofing possibilities, and how they could minimize the cost to the church and school with the aid of storm related insurance dollars.

"Everyone should be pleased to know the new roof was ninety percent paid by insurance. We were very impressed with Scott's level of knowledge and helping us select the best roof to meet our budget and needs. He was also very quick to respond to any questions along the way - even after the new roof was installed!" Bob explained further.

"While the roof was being installed I suggested to Pastor Kristina Ahlman to go bless our 12 roofing disciples - as there were 12 men with great precision installing the new roof - to which she did. Many community members stopped by to gaze at our new roof being installed too - it was lots of fun!"

The new gymnasium roof installation is a perfect fit, whereas the Atlas StormMaster® Shake combines strength and beauty, resisting high winds, harsh impact, and extreme weather conditions. The StormMaster® Shake features Scotchgard™ Algae Resistant Shingles and will resist cracking, splitting, warping, or shrinking in both hot and cold weather for many years. The protective power of these asphalt shake shingles will increase the value of the school, while the added dimension that comes with architectural shingles will increase the overall curb appeal of the Solomon Lutheran School, too.

The Atlas StormMaster® Shake has a Class 4 Impact Resistance - the highest impact rating available. It can provide superior resistance against wind and wind driven rain up to 130 mph too! Plus, the shingles were manufactured using SBS Technology which incorporates a rubberized SBS polymer to help create a more durable and longer lasting shingle while providing protection in extreme weather conditions like we have in Ohio.

We thank you for giving us this opportunity to serve you. We are committed to providing all members of the Solomon Lutheran Church and School the same level of satisfaction which hundreds of our valued customers have enjoyed in the past with Residential Renovations. As a way of showing our commitment we would like to extend a special discount to any one related to the Solomon Church or School by simply mentioning your connection with the Solomon Lutheran Church and/or School when you call or email us for an estimate!
