

SL-16[®]

PRODUCT INFORMATION

- Panel Type - Concealed Fastener Metal Panel
- Panel Width Coverage - 16"
- Rib Height - 1"
- Gauges - 29 and 26 gauge
- Metal Panel Substrate - Galvalume[®]
- Paint Finish Type - Siliconized Polyester

American Building Components wants your building to give you years of beauty and reliability. SL-16[®] panels are formed from high tensile strength, 29 & 26 gauge steel, which is protected with a Galvalume[®] coating. Our state of the art Signature[®] 200 paint system is then applied, providing years of warranted protection for our color coated panels.

SL-16[®] is manufactured for your application and is available in cut-to-the-inch lengths.

For a complete line of trim and accessories, please refer to our Trim and Accessories catalog. Refer to ABC's published color chart to select any of our many contemporary colors.

While asphalt traps heat...

metal roofs reflect solar energy...

and pigments re-emit heat.

ABC Metal Roofing: Elegant, Durable, Efficient and Resistant

Residential metal roofing is becoming increasingly popular because of its strength, aesthetic appeal, minimal maintenance requirements, resistance to fire, wind and hail and outperformance compared to other materials in most climate zones and seismic areas. They are also energy efficient, recyclable, lightweight and can increase the value of your home. Our metal roof panels are available in wide variety of vibrant colors, which helps add beauty to any home.

ABC metal roofs typically last 40 years or more, meaning that it's probably the last roof you have to put on your home. Our roof panels are coated in Cool Roof colors and allow for significant savings in energy costs. They consist of 25-35% recycled materials, are virtually 100% recyclable and help reduce air pollutants.

Why choose ABC?

ABC is one of the largest manufacturers of metal roof and wall panels in North America. Founded in 1908, our history in the industry has allowed us to establish a stronghold and provide customers with exceptional warranties and product and technical expertise. ABC offers complete roofing systems, including customized flashing, color-matched trim and fasteners, which provides a sleek, polished appearance for your roof.

The engineering data contained herein is for the expressed use of customers and design professionals. Along with this data, it is recommended that the design professional have a copy of the most current version of the North American Specification for the Design of Cold-Formed Steel Structural Members published by the American Iron and Steel Institute to facilitate design. This Specification contains the design criteria for cold-formed steel components. Along with the Specification, the designer should reference the most current building code applicable to the project job site in order to determine environmental loads. If further information or guidance regarding cold-formed design practices is desired, please contact the manufacturer.

Descriptions and specifications contained herein were in effect at the time this publication was approved for printing. In a continuing effort to refine and improve products, ABC reserves the right to discontinue products at any time or change specifications and/or designs without incurring obligation. To ensure you have the latest information available, please inquire or visit our website at www.abcmetalroofing.com. Application details are for illustration purposes only and may not be appropriate for all environmental conditions, building designs or panel profiles. Projects should be designed to conform to applicable building codes, regulations and accepted industry practices. If there is a conflict between this manual and project erection drawings, the erection drawings will take precedence.
